

Synergi Solutions AS

Synergi Solutions AS

Synergi Solutions AS is an international software company providing customers with Synergi®, a complete HSEQ software for risk and non-conformance management. Synergi® is implemented by over 200 organisations globally in energy, industry, transport and health sectors. Synergi® is used in 17 languages, in 90 countries by more than 300 000 users. The company headquarters are in Stavanger, Norway. In addition to that, we have subsidiary offices in Sweden and the UK and partners covering all major markets globally. Today we are 30 employees.

Technical Support / Synergi Software Developer

Synergi is built on a modern n-tier Service Oriented Architecture (SOA) and uses the latest in tools and technologies from Microsoft. Synergi's product vision is to develop the **ultimate** Risk Management Software suitable for **global** deployment with superior **usability** using state **of the art technology**. To achieve these goals we need to strengthen the staff with more developers.

Synergi® is a module based application used to collect, process and analyze information related to HSEQ and risk management. The graphical user interface and business rules for each software module are implemented in the Synergi® database.
