

We know for a fact that the whole can be greater than the sum of the individual part

That is why Synergi® Solution takes a holistic approach to HSEQ. Our company name was chosen as a promise and an obligation. As the term Synergi is used to describe a situation where different entities cooperate advantageously for a final outcome, our module based World Class Risk Management System is designed to do just that. Each module can of course be used as a standalone solution, but they are highly recommended in tailor-made combination to fit the exact needs and focus of each individual client and user.

For 20 years we have been puzzling different pieces together to make sure our clients are able to see a bigger and more complete picture and by doing so being able to make a better use of their efforts.

To celebrate our success story we invite you to an on-line happening. This competition is the first of our anniversary events. You may well research the answers in advance as long as you make sure you enter the competition during the next couple of weeks. The lucky winner will be announced on our website the 7 December 2009.

Please participate by logging on to www.synergi.com

Best regards

Olaf Larssæther
CEO Synergi Solutions AS

The advantages of being able to report in Synergi® are substantial

This is a fact that we are celebrating every day. In our magazine Synergetic and on our website you can read some interesting articles pinpointing facts and revealing views shared by some of our clients. Here are a few quotes:

Synergi® is a highly flexible system. Once you understand the possibilities you will realize what a phenomenal and massive tool it is.
Elaine Rust, Global HSEQ Systems Manager at Subsea 7

A fantastic tool with a high degree of user-friendliness. It is easy to extract the exact data you need.
Odd Lynnebakken, Safety Advisor, The Airport Express Train (flytoget)

Instead of assuming why things happen - you can document it and spark real action.
Annica Öhrn, Patient Safety Coordinator, Östergötland County Council

Our HSE changes program is worth seven million Euros per year in reduced insurance cost.
Ørjan Storesund, HSE Coordinator, STX Europe

detecting risk
