

Norske Skog – 24 hours care-taker

Norske Skog is a global supplier of publication paper with activities on all the continents except Africa. The company is a major user of recovered paper, and the world’s biggest newsprint paper producer. Norske Skog encourage their employees to “Take Care 24 Hours”, think health and safety in private as well as at work.

Benefits of Synergi® for Norske Skog

- Synergi® has improved the over-all H1 factor (lost time injuries per million hours worked) from 20 in 1998 to 1.3 in 2005.
- Through measuring H&S, Synergi® facilitates management’s benchmarking of mills world wide.
- Synergi® makes up the necessary platform for a common understanding of the H&S policy and communication across the various units, cultures and countries.

“Everything that can be measured can be improved. Synergi® has enabled us to measure our health and safety level, and made that important H1 factor drop considerably in few years.”

Mr. Jens Borge, Norske Skog ASA, Vice President H&S

Pride ASA’s consultants are professional both in respect of Norske Skog’s particular business and software implementation. Good relations and an extremely high degree of service is a matter of course.

Synergi® is used proactively by Norske Skog as a health and safety management system to prevent unwanted incidents and accidents and to control rest risk. Every bit of H&S-relevant information is put into Synergi® to achieve the knowledge and consciousness needed to fulfil Norske Skog’s H&S policy.

About Norske Skog

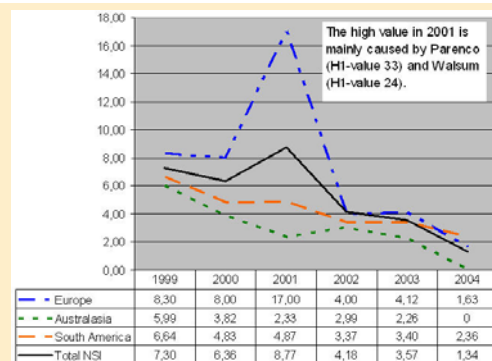

Employs a total of about 8000 people world wide. Ca 1500 in Norway.

Challenge

Stand alone systems, or lack of system on the mills around the globe made communication of the same platforms for H&S work impossible.

Solution

Implementation of the software Synergi® with language independent statistics.

After the implementation of Synergi®, the H1 factor has fallen considerably (from 20 to 1.3 in 7 years). The high numbers for 2001 are due to the purchase of factories in Netherland and Germany.

Synergi Solutions AS is always actively involved in assisting their customers putting Synergi® into proper use at all stages. Our HSEQ consultants have considerable experience from oil and offshore, transport and communications, the process industry, the building and construction industry and the public sector, in addition to knowing Synergi® from A to Z.
