

**Dear Synergi client,
you are cordially invited to attend:**

**a Synergi User Group meeting hosted by the
Logica / Synergi Partnership, for "Managing
Quality, Health, Safety, Security and the
Environment in the Oil and Gas Industry"**

Guest Speaker: Carolyn Pierpont, (Synergi Manager, Technip).

Managing compliance with quality, health, safety, security and environmental regulations in the oil and gas industry is a critical success factor. Companies that can achieve full compliance in a cost-effective manner are better able to focus on core competencies and improve their competitive advantage.

For this reason the Logica / Synergi partnership will be hosting a Synergi user-group meeting to share the best practice for managing quality, health, safety, security and the environment in the oil and gas industry and to address user-group issues. This meeting will allow plenty of time for networking opportunities with industry colleagues over lunch and we hope you will join us.
