

“Managing Quality, Health, Safety, Security and the Environment in the Oil and Gas Industry,”
a free of charge seminar proudly presented by the
Logica / Synergi Partnership.

Guest Speaker: Elaine Rust (Synergi Manager, Subsea7).

Managing compliance with quality, health, safety, security and environmental regulations in the oil and gas industry is a critical success factor. Companies that can achieve full compliance in a cost-effective manner are better able to focus on core competencies and improve their competitive advantage.

For this reason the Logica / Synergi partnership will be hosting a seminar to share the best practice for managing quality, health, safety, security and the environment in the oil and gas industry. This seminar is a must for industry professionals involved in QHSSE & IT and it will allow you plenty of time for networking opportunities with oil industry colleagues over lunch and we hope you will join us.
